

# Implementing Cisco Enterprise SD-Branch (ENSDBI) v1.0

## What you'll learn in this course

The **Implementing Cisco Enterprise SD-Branch (ENSDBI) v1.0** course is designed to teach you to understand the Cisco® Software-Defined (SD)-Branch architecture and Cisco Enterprise Network Functions Virtualization (ENFV) solution. Through a series of in-person or e-learning lectures and labs, you will learn about the supported hardware platforms with a focus on the components, installation, and upgraded workflows of the Cisco Enterprise Network Compute System (ENCS) 5400 series. Additionally, this course will help you build your skills on Virtual Network Functions (VNF) deployment and orchestration solutions on Cisco ENCS.

## Course duration

- Instructor-led training: 2 days in the classroom with hands-on lab practice
- E-learning: The equivalent of 2 days of instruction and hand-on lab experience

## How you'll benefit

This course will help you:

- Develop the knowledge necessary to understand the Cisco SD-Branch and its architecture
- Deploy the Cisco ENCS
- Gain hands-on experience with Cisco Network Function Virtualization Infrastructure (NFVIS) and vManage
- Further your skills as a system installer, integrator, or administrator

## Who should enroll

- System installers
- System integrators
- System administrators
- Network administrators

## Technology areas

- Networking
- Systems integrations

## Course details

### Objectives

After taking this course, you should be able to:

- Describe the Cisco SD-Branch solution and its architecture
- Explain the hardware components of the Cisco ENCS 5400 and Cisco Catalyst® 8200 Series Edge Universal Customer Premises Equipment (uCPE)
- Install and access the Cisco Enterprise NFVIS on Cisco ENCS 5400
- Understand the VNF Lifecycle management and its deployment
- Identify Cisco Enterprise NFVIS Security considerations
- Explain the Cisco SD-WAN solution and its components
- Describe the Cisco ENCS orchestrations systems and Representational State Transfer (REST) APIs
- Deploy the Cisco ENCS using orchestrators
- Monitor and troubleshoot Cisco ENFV components using Cisco vManage

### Recommended knowledge and training

Before enrolling in this course, you should have:

- A strong understanding of routing protocol operation, including interior and exterior routing protocol operations
- Familiarity with Transport Layer Security (TLS) and IP Security (IPSec)
- A basic understanding of Hypervisor and virtualization

Recommended Cisco offerings that can help you meet these prerequisites:

- **Implementing and Administering Cisco Solutions (CCNA®)**
- **Implementing Cisco Enterprise Network Core Technologies (ENCOR)**

## How to enroll

To enroll in the ENSDBI course or explore our larger catalog of courses on Cisco Digital Learning, contact us at <LP email/URL>

### Outline

- Introducing Cisco SD-Branch Architecture and Cisco ENFV Solution
- Preparing Cisco ENCS Device for Deployment
- Deploying VNFs on Cisco ENCS
- Working with Cisco ENCS Orchestration
- Monitoring and Managing Cisco ENFV Components

### Lab outline

- Explore Cisco ENCS and Cisco Enterprise NFVIS Portal
- Deploy Cisco Virtual Machines (VMs) and VNFs
- Deploy Orchestration using Cisco vManage
- Monitor and Troubleshoot Cisco ENCS device
