MS-4010-A Build plugins and connectors for Microsoft 365 Copilot

Course Description

This training course is designed to help you understand the extensibility options available for Microsoft 365 copilot. You will learn about the different ways to extend Copilot, including building plugins and connectors, and how to choose the right option for your use case. The course also covers best practices for building high-quality plugins and connectors, as well as data, privacy, and security considerations. Whether you are a pro-code or low/no-code developer, this course will help you chart your path to extending and customizing Microsoft 365 Copilot.

Course Duration

1 day

Prerequisites

No Prerequisites

Course Outline

- Build plugins and connectors for Microsoft 365 Copilot
- Extend Microsoft 365 Copilot with declarative agents using Visual Studio Code

Who Should Attend

This training course is targeted at developers who are interested in extending and customizing Microsoft 365 Copilot. This includes both pro-code and low/no-code developers who want to learn about the different Copilot extensibility options available and how to choose the right option for their use case.
