

AZ-1006: Migrate and Modernize SAP in the Microsoft Cloud

Course Description

This 1-day course teaches IT professionals who have experience with SAP solutions how to use Azure resources that include setting up and configuration of SAP environments in Azure for virtual machines, virtual networks, storage accounts, and Microsoft Entra ID. Learners will also explore backup, disaster recovery, and monitoring of SAP systems in Azure. Learn through the application of concepts, scenarios, and procedures through hands-on labs using Azure Center for SAP solutions.

Course Duration

1 day

Course Outline

- Modernize and explore Azure for SAP workloads
- Modernize and explore the foundations of IaaS for SAP on Azure
- Modernize and explore the foundations of identity and governance for SAP on Azure
- Modernize and deploy SAP on Azure
- Modernize, ensure business continuity, and implement disaster recovery for SAP solutions on Azure
- Modernize and migrate SAP workloads to Azure
- Modernize, monitor, and troubleshoot Azure for SAP workloads

Who Should Attend

Administrators of SAP systems that run on Azure should take this course. Before taking this course, candidates should pass the Azure Administrator (AZ-104) or Azure Infrastructure Solutions (AZ-305) exam and have completed training in SAP HANA or SAP NetWeaver.
